

## HARD COPY ADAPTORS FOR DATA-SCREEN Terminals

TEC offers optional hard copy adaptors (HCA) for Series 400 and Model 1400 MINI-TEC DATA-SCREEN Terminals.

Series 400 HCA option utilizes an ASCII serial asynchronous data interface. Data transmission is buffered by the terminal and will output at baud rates from 110 to 4800. Signal levels available are:

RS-232C  
TTL  
20 mA current loop

Model 1400 MINI-TEC HCA option incorporates all of the Series 400 interface capabilities plus an expanded range of 110 to 9600 baud which is selectable by the operator on the back panel of the terminal. In addition to the SERIAL asynchronous interface the Model 1400 HCA option is also available with a PARALLEL interface with TTL drivers.

TEC's Hard Copy Adaptors will interface with these printers\*:

<u>MODEL 1400 MINI-TEC</u>	<u>400 SERIES</u>
Centronics	Centronics
