

Here's how to keep systems
running clean and error-free.

Datalife[®] Head Cleaning Disks quickly, easily improve computer and word processor performance.

Dust, dirt and debris can easily contaminate a system's flexible disk drives. That can result in vital data loss, cause errors, and hinder systems' performance.

Verbatim's Datalife Head Cleaning Kit can remove most of the debris contaminating drive heads. Ease worry about system performance. Minimize costly professional cleaning calls. Enable computers and word processors to run clean and error-free!

Quick and easy to use. All you have to do is remove a Cleaning Disk from its protective pouch, put the presaturated disk in the special jacket, insert it into a drive and turn it on.

In just 30-60 seconds, the drive

heads are cleaned.

Cleaning, with no cleaning mess. With the Datalife Head Cleaning Kit there's no hit-and-miss applying solvents that can splash and spill. The Cleaning Disks are presaturated with just the right amount of cleaning solvent.

What's more, with Datalife Cleaning Disks, every time you clean your heads, you can do it with a fresh, clean, disposable disk.

Cleans both single and dual head drives safely. There's no worry about damaging the heads, drives or system with Datalife Cleaning Disks, because the disks are non-abrasive.

The Datalife Cleaning Disk will

clean any 5¼" or 8" system, with only one exception - those using a Memorex 651 drive. It will clean either single or dual head drives. The disk, as packaged, is for single head drives. Simply remove a small label on the Lexan jacket, and the disk is ready to clean dual head units.

Protect your investment. The Datalife Head Cleaning Kit will help you guard against data loss, errors, and degradation of system performance because of debris contamination.

So if you want your data back verbatim, keep it on Verbatim Datalife Disks. And keep your disk drives clean with Verbatim's Datalife Head Cleaning Kit.

Head Cleaning Kit

This portfolio contains:

One durable Lexan[®] jacket.

Two individually-packaged, pre-saturated, disposable cleaning disks.

Instructions for use of jacket and disk.

Packaged in this way, the user is afforded an opportunity for a low cost maintenance program.

8" = Reorder #21132

5¼" = Reorder #21144

10 Head Cleaning Disks

This shrink-wrapped folder contains ten (10) replacement disks. These disks are sealed individually in protective foil pouches until it's time to clean the drive heads.

8" = Reorder #21133

5¼" = Reorder #21145
