

A VT100 for Industry

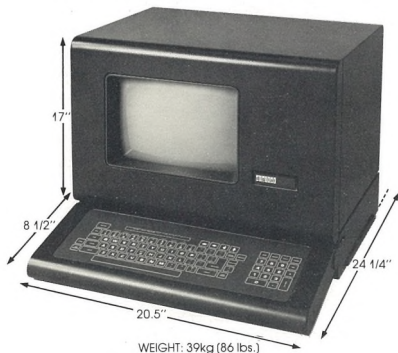

The RT100

Ca. Price 10,000

Digital took its experience in advanced terminal technology and its knowledge of the industrial marketplace and designed a terminal for the manufacturing environment. Called the RT100, it combines Digital's VT100 high performance video display terminal with specialized protective exterior hardware that well equips it for industrial applications.

The RT100 console and keyboard are housed in a durable sheet metal enclosure that protects the terminal from abuse and unclean environments. Its detachable, flat membrane keyboard is grease and oil resistant and can be cleaned with common liquid soap and detergents*. For ease of maintenance, the air filter is contained in a side, slide-out drawer and can be easily removed for cleaning or replacement.

The RT100 can be either table-top or shelf mounted. Its keyboard is detachable and can be placed anywhere within two feet of the terminal. This allows you to mount the keyboard in a place and position convenient for your operators' use.

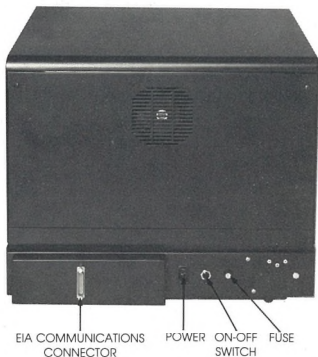

*Caution: Some organic solvents will cause staining or damage to the membrane keyboard.

The RT100 is based upon the VT100 and offers you all the features that have made the VT100 Digital's most popular terminal. These features include:

- Full alphanumeric keyboard and standard numeric function keypad for quick and easy data entry
- Double-width/double-height characters to increase screen readability

- Bidirectional smooth scrolling
- A split screen that allows constant data to remain on the screen without multiple retransmissions
- Normal and reverse video; composite video output
- Flexible set-up mode for selecting and storing built-in terminal features
- Built-in product reliability

SPECIFICATIONS

Environment:

Operating Temperature: 10°C (50°F) to 50°C (120°F)
Storage Temperature: -40°C (-40°F) to 66°C (151°F)

Humidity:

Operating: 10% to 90% (non-condensing)
Storage: 0% to 95% (non-condensing)

Power: 300 W

Communication: Full-duplex asynchronous

OPTIONS

RT100-AB Terminal with Standard EIA Communication Connector

RT1XX-AA Optional 20mA Communication Connector
