The company that brought you more computer for your money, now brings you more of everything!

Only recently, Spectravideo has electrified the home electronic world with a new computer: the SVI-318MKII. Its performance was so stunningly better than anything in its price range, that it grabbed the immediate attention of consumers everywhere. And it drew quiet nods of approval from even the most prestigious computer experts.

The fact is, while few people had heard of Spectravideo 6 months ago, right now there are few people in the computer industry who haven't heard of us.

Spectravideo is a company on the move. With dramatic innovation in all areas – computers with supporting peripherals, software, accessories (of ours and other systems) – we will continue to design and offer truly remarkable computer systems .... "systems you'll grow into, not out of."

SVI-328MK II Personal Computer

While the SVI-318MKII was "everything I've been waiting for in a home computer" (in the exact words of many people), the SV-328MKII fills another important niche. This, our upgraded model, is specially designed "for the small business that doesn't plan to stay that way". It's just ideal for a young but growing enterprise, as well as for serious home computing. And we think it, too, stands alone in its price range.

- 32K ROM Expandable to 96K
- 80K RAM Expandable to 144K
- Built-in SV Microsoft Extended BASIC
- Z80A Microprocessor
- Special Word Processing Keys
- Built-in CP/M Compatibility
- Full-stroke Professional Keyboard with 87 Keys
- 10 User-Definable functions
- 16 Colors
- 3 Sound Channels, 8 Octaves/Channels
- Programmable A.D.S.R. Envelope
- Built-in Modulator

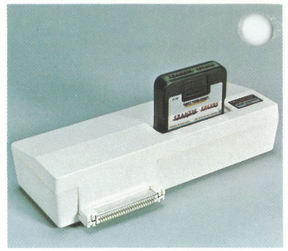
SVI-318MK II Personal Computer

The SVI-318MKII is the computer that puts Spectravideo in the limelight. It offers features previously unspeakable at a competitive price. At the heart of its superiority is its exceptional memory: 32K ROM expandable to 96K and 32K RAM expandable to 144K. It also has built-in CP/M compatibility, a Z80A microprocessor and much, much more:

- Built-in Macro Sound & Macro Graphics Commands
- Built-in Joystick/Cursor Control
- 74 Keys
- Special Word Processing Keys
- 32 Graphic Sprites
- 10 User-Definable Functions
- 16 Colors
- 3 Sound Channels, 8 Octaves/Channels
- Programmable A.D.S.R. Envelope
- Built-in Modulator

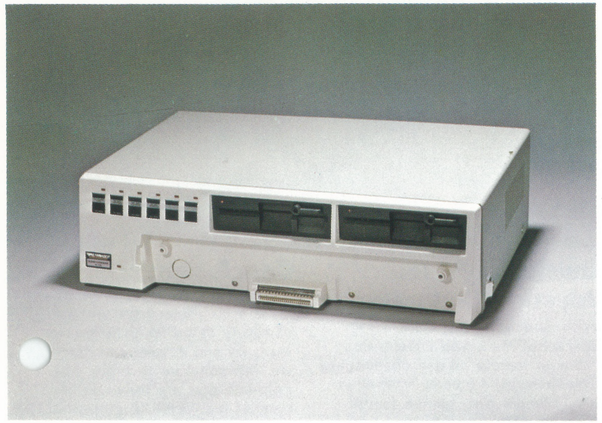
SVI-602 Single Slot Expander

If you do not need to run several different peripherals at once, you will like our high-quality, single-slot expander. It houses one interface cartridge, and provides a very economical mean of interfacing your SVI computer with a single peripheral at a time.



SVI-603 Game Adaptor

We admit that Colecovision™ – with its many advanced features – provides some of the most thrilling, realistic video game action in the world. But why buy a Colecovision™ machine that only lets you play video games when, for just a little more money, you can play all the great games from Coleco and have your very o computer? It sounds too good to be true, but Spectravideo's unique Colecovision™ Game Adaptor makes it possible. The adaptor easily hooks up to the SVI-318MKII or the SVI-328MKII.



SVI-605/605A Super Expander

The real value of any computer system lies in its ability to accommodate a large variety of input/output devices simultaneously.

Compact, low profile and advanced in every way, this Super Expander with one built-in drive for SVI-605 or two for SVI-605A uses standard 5¼-inch flexible diskettes. Its configuration is single-sided double density, allowing a capacity of 256K bytes of data (unformatted), opens the door to the virtually unlimited world of CP/M software. The formatting speed is ultra fast – it formats in just 46 seconds! It's even compatible with the Xerox® 820 Disk Format.

With the addition of our Super Expander, the SVI-318MKII or SVI-328MKII can interface with as many as six different devices at once.

Extremely sturdy housing by a metal dust cover can support a 15-inch TV or monitor weighting to 50 lbs.; frontal panel read out, built-in dual Disk Drive Controller and Centronics Printer Interface, space for additional Floppy Disk Drive (SVI605) minimum head/diskette wear, internal write-protect circuitry for disk drive, peripheral interface cartridge in-use LED indication, power-on LED indication.

SVI-803 16K RAM Cartridge

Allows you easily and economically to add 16K worth of "Random Access Memory" to your SVI computer. You can bank switch to a second bank of memory from BASIC.

SVI-805 RS-232 Interface Cartridge

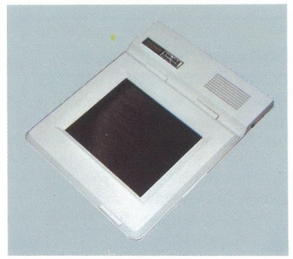
A serial communications adaptor designed to interface with various communication devices and printers.

SVI-806 80-Column Display Cartridge

Allows a visual display of 80 characters by 25 lines on any low-cost video monitor.

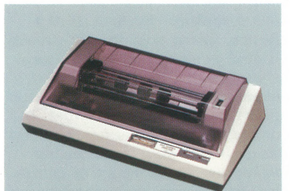
SVI-807 64K RAM Cartridge

Allows you to add a whopping 64K of "Random Access Memory" to your SVI computer, bank switching can be easily performed from BASIC.



SVI-105 Sensor Touch Graphic Tablet

By just applying your finger or the point of a pencil, you can instantly become a Picasso in the exciting realm of computer graphics. Modes such as Draw, Erase, Color and Clear are provided in a software package. Pictures drawn on the tablet can appear on the TV screen of multi-colors, according to your taste. The masterpiece you have created will appear on the screen and can then be stored on a cassette tape or diskette or printed. It will, of course, become valuable as you turn out to be a famous artist!



SVI-901 Dot Matrix Printer

Whatever information you feed into your SVI-318MKII, this low cost/high performance peripheral will print out beautifully. Capable of printing a full 80-character wide, the SVI-901 prints both characters and graphics at bi-directional speed of 50 cps. Tractor paper feed system is adjustable up to 10 inches, preventing paper jamming and misfeeding.

SVI-904 Data Cassette

Connecting easily to the SVI-318MKII or SVI-328MKII, our data cassette provides an in expensive means of running and storing a wide range of computer programs. Extremely fast, (Baud Rate of 1,800 bps), rugged, good-looking stylishly and intelligently designed.

CompuMate™

There are millions of Atari VCS™ owners out there, and we can put every one of them behind a computer for an amazing small amount of money. It's our new CompuMate™, which attaches to the VCS and turns it into a real fully-functioning computer! It sports a 42-key "Sensor Touch" keyboard and 16K ROM with built-in BASIC. There couldn't be a better way to learn your very first program than on the CompuMate™, yet you can write more advanced ones on it too. Also offering 2K built-in RAM, the compuMate™ lets you run many of the educational and recreational programs from Spectravideo, and naturally you can store and retrieve all your valuable programs by attaching to any cassette recorder. With a built-in "Magic Easel" program, the CompuMate™ even allows you to draw pictures in up to 16 colors! Finally, the CompuMate has a built-in "Music Composer" program that makes you an instant musician!

Quickshot™ Joystick Controller

Beating most video games is easy. But beating one single-handed is not . . . . . Now that's a real challange! You can do it though. With the Quickshot™ I, you can control and fire at the same time! You'll also have a much better grip, thanks to the special contoured design so that your palm will wrap around like a glove. But in case of your trigger finger gets tired, you can switch to the other hand, because the Quickshot™ I features an optional left-hand fire button, too. Finally, the Quickshot™ I comes with four removable suction cups that grip firmly on most any surface, and an extra long cord.

For use with the Atari™ VCS, Sears Video Arcade™, Commodore VIC-20™, Commodore 64™, Atari™ 400, 800, 600XL, 800XL & 1200, NEC PC-6001™ series computers.

Quickshot™ II Joystick Controller

The Quickshot™ II is the new, improved model of the original best-selling Quickshot™ I. This amazing joystick features a fire button located on the front of the grip like a real trigger! There is also a top fire button that curves sleekly around towards the back of the joystick, giving your thumb a really bit (and comfortable) surface area to work with. The auto fire switch allows you to unleash a continuous stream of bullets at your target. The completely new ultra-ergonomic grip design leaves your hand feeling relaxed even after hours of games play. In addition, there are four built-in self-stabillizing suction cups that make one-hand game play a breeze.

For use with the Atari™ VCS, Sears Video Arcade™, Commodore VIC-20™, Commodore 64™, Atari™ 400, 800, 600XL, 800XL & 1200, NEC PC-6001™ Spectravideo's own SVI-300 series computers and others

Quickshot™ III Joystick Controller

With Spectravideo's new Quickshot™ III, you'll really be "able to handle" those challenging Colecovision™ games – whether it's Coleco's own games or the exciting ones Spectravideo now makes for Colecovision™ (which can also be played on Spectravideo computers through the use of our Coleco™ Game Adaptor). There are two sets of independent fire buttons that are color coded for your convenience. The two buttons on the grip make one-hand control play possible. However, if your trigger finger tires, you can simply switch to two-hand control by employing the two fire buttons on the controller base. The grip is sleekly contoured and comfortable, and the non-glare numeric keypad allows you to select game levels and number of players. The Quickshot™ III also features self-stabilizing suction cups and an extra long cord.

Conclusion:

Spectravideo is more of what you want a computer/high technology company to be. With extensive research and development facil we will continue to bring you products that are truly "on the crest of the wave". The newest. The best. The most relevant and useful to you. Yet our commitment to you only begins when we sell you a computer, software program or other related item. We offer a nationwide service network and warranties on all our products (as stated in the warranty cards that accompany each product distributed).

Like most people, you may be just starting out in personal computers. If you are, ask yourself this question before you make your purchase: Is the system I'm buying capable of and expandable enough to keep up with my demands as they accelerate?

With so many products already available, and many more on the way, Spectravideo is truly 'The System You'll Grow Into, Not Out Of."

Software

Software is what makes your computer run. And while even neophytes will want to write their own special programs, the fact remains that most people rely heavily on pre-written software programs.

Well, this is another area where the SVI-318MKII shines. Because it is compatible with CP/M – the largest software library in the world – the SVI-318MKII lets you walk into most any good computer store and choose from literally thousands of pre-existing software programs. Also, since we fully expect the SVI-318MKII to be a dominant force in personal computers, many 3rd party manufacturers are certain to start writing programs for us.

Yet the most important source of software for the SVI system will be Spectravideo itself. We've already initiated an aggressive and far-reaching software development program to cover all areas: education, personal interest, business applications, recreation, programming aids, and many more!

Recreational Programs

Spectravideo brings you many great arcade-quality games, including the following:

- Armoured Assault™
- Frantic Freddy™
- Super Cross Force™
- Sector Alpha™
- Music Mentor™
- Biorhythm™
- 3D Tic-Tac-Toe™
- Number Game™
- Boa™
- Car Ace™
- Juno Lander™
- Spectra Breakout™
- Horse Race™

Programming Aids

To assist programmers, both beginning and experienced, Spectravideo offers three programming aids:

- Spectra Sprite Editor™
- Spectra Font Editor™
- Introduction to BASIC

Software Programs for other Computer Systems

Spectravideo continues to add on to an impressive list of new games for the Atari VCS™, Atari™ 400/800, VIC-20™, and the ever popular Colecovision™ Game Machine. A partial list includes:

- Number Crunch™
- Gold Mine™
- Cave-In™
- Sector Alpha™
- Ape Escape™
- Gas Hog™
- Bumper Bash™

Personal Interest And Business Application

We have various software in these categories. A partial list includes:

- Spectra Home Economist™
- Spectra Checkbook™
- Spectra File Cabinet™
- Spectra Diary™
- Spectra Financial Calculator™
- Address Book™

Educational

We have many educational software programs available. Here is a partial list:

- U.S. Geography™
- U.S. Presidents™
- The Planets™
- The Constellations™
- Typing Tutor™
- Basic Tutorial
- Star Words™
- Acutype™
