

Nokia PC

Professional Computer

Nokia PC is friendly and comfortable to work with also in heavy-duty professional use.

It is uncompromising in its technical solutions: only the very latest state-of-the-art technology has been used. The flicker-free high quality 15-inch screen with dark characters on a light background makes the display pleasant and reduces strain on the eyes.

The sculptured low-profile Nokia PC Keyboard is detached for easy adjusting and operator comfort.

NOKIA DATA

Technical data

Nokia PC System Unit

- Single Board Computer
 - 80186 Intel microprocessor (16-bit)
 - 128-256 kB dynamic RAM
 - 16-64 kB EPROM
 - CCITT V.24/V.28 or CCITT X.24/X.27 asynchronous or synchronous communications channel
 - CCITT V.24/V.28 asynchronous printer channel
 - Five-slot internal expansion bus
- Video Display Controller
- Mass Memory Controller
 - One or two 5 1/4" floppy disk drives with a formatted capacity of 320 kB or 640 kB per each drive
 - Optionally a 5 or 15 MB Winchester disk
- Memory Expansion
 - 256 or 512 kB dynamic RAM expansion as an option
- Serial I/O Expansion
 - Two high speed serial I/O channels
 - Both channels with V.24/V.28 or X.24/X.27 signals
 - Asynchronous or synchronous operation

Nokia PC Display Unit

- Monochrome Display Unit
 - 15 inch CRT
 - 70 Hz refresh frequency, noninterlaces
 - White phosphorous with dark characters on light background
 - Non-glare faceplate
 - Screen display 24+4 lines
 - 80 characters per line
 - Character matrix of 8 x (9+2) dots in a field of 10 x 15 dots
 - Up to 512 characters
 - Six character attributes for each character
 - Graphics resolution 400 x 160 dots, as an option 800 x 420 dots
